TECHNICAL DRAWING

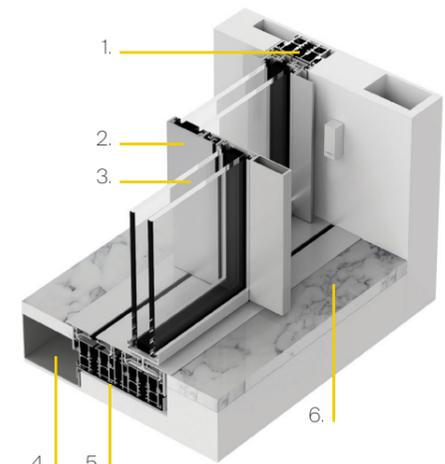

IDEAL FOR EVERY SITUATION

This minimalist system is suited for premium jobs. It was developed to use double glass up to 38mm thickness, up to 6m height or a glass surface of up to 18m². This robust window offers excellent acoustic and thermal performance.

Developed with sophistication and attention to design in mind, this system is characterized by the smallest central mullion in the market and an integrated frame option that fully hides all the aluminium, resulting in a obstacle-free threshold and fully integrated aluminium frames.

Possibility of connection to home domotics.

This system allows the inclusion of blackouts, blinds, screen in the interior glass and fly screens. More then 6m of glass is possible but requires a pre-analysis of the needs of the project, wind load pression, deflection and weight.

1. Main Frame
2. Central Mullion
3. Glass
4. Drainage System
5. Inox Gutter
6. Interior finish

Opening Options

- Mono / Bi / Tri / Quad. + Rails
- Corner Module
- Pocket Module
- Motorized

Maximum Weight

1000kg/ML

Locking and Security System

You can integrate a key lock for better security and control. The cylinder lock is hidden on the wall for an invisible frame effect. You can integrate an electromagnetic lock for better security and control. Alarm Contact, Digicode, Finger Scan integrated in the wall or in the frame.

Multi-point Lock

HYLINE features a multipoint locking system. The mechanism is completely hidden in the frame and each locking point is adjustable.

Finishing Options

- HYLINE Colour Essentials (Ral Colores STD)
- HYLINE Natural Metals (Qualanod EURAS Class 2 STD)
- HYLINE Advanced Coating (Hiper Durable Finishings)
- HYLINE Luxury Collection under Qualicoat Seaside Standards

INVISIBLE FRAME PERIMETRAL

At HYLINE, only the window is seen. Landscape framing is reduced to ultra thin lines of 8mm aluminium view for the chassis.

INTEGRATED FLOOR

The HYLINE system allows to ensure visual continuity and material between the inside and outside.

HYHANDLE

Handle with exclusive design.

THE FLY

The fly screen system is a perfect, easy to use solution to naturally ventilate your home while being an effective protection against insects and pollen. This manual or automatic system is fully integrated in the frame, only being visible when in use.
